Profile

Senior Full Stack Engineer with 5+ years of experience designing, building, and scaling enterprise-grade web applications using React, Next.js, TypeScript, Node.js, MongoDB, PostgreSQL, and AWS. Experienced in architecting reusable frontend systems, scalable REST APIs, RBAC, authentication, cloud-based deployments, and performance optimization. Strong background in leading end-to-end feature development, collaborating with cross-functional teams, and delivering customer-focused SaaS products. Passionate about AI-assisted engineering, modern software architecture, developer productivity, and building maintainable systems that scale. Leveraged AI-assisted development tools (Cursor, GitHub Copilot, Claude Code) to accelerate feature implementation, improve code quality, and automate repetitive engineering workflows.

Work Experience

Full stack developer

March 2025 – present

CodeElan Technologies

- Designed and developed scalable AI-powered enterprise applications using React, Next.js, TypeScript, Node.js, MongoDB, and AWS.
- Played a key role in developing OmniScientia AI, integrating OCR and Face Recognition (FRS) with AWS cloud infrastructure and proprietary machine learning models.
- Architected secure authentication and Role-Based Access Control (RBAC) systems supporting enterprise user management.
- Designed reusable frontend architecture and shared component libraries, reducing feature development effort across multiple modules.
- Developed scalable REST APIs supporting enterprise AI workflows while improving response latency and maintainability.
- Collaborated with product managers, designers, QA engineers, and stakeholders throughout the software development lifecycle.

Software Engineer

January 2022 – February 2025 | Jaipur

Decipher zone Technologies Pvt. Ltd.

- Led frontend development of high-traffic SaaS products using React, TypeScript, Node.js, Express.js, and MongoDB.
- Improved backend API performance by nearly 30% through database indexing, optimized queries, and response caching.
- Enhanced frontend rendering performance by approximately 25% using memoization, lazy loading, optimized state management, and bundle optimization.
- Built reusable UI components and shared application modules reducing development effort across projects.
- Designed REST APIs and collaborated closely with backend engineers to improve scalability and maintainability.
- Conducted code reviews, resolved production issues, and maintained high engineering standards across releases.

Solution Engineer

January 2021 – December 2021 | Jaipur

Extern Labs Pvt Limited

- Designed scalable web applications using React and Node.js for enterprise clients.
- Led frontend feature implementation while coordinating with designers, QA teams, and backend developers.
- Delivered business-critical finance platform features improving operational efficiency.
- Mentored junior developers and contributed to technical planning and sprint execution.

Skills

- Language:** JavaScript (ES6+), TypeScript, Python (Basic)
- Frontend:** React.js, Next.js (App Router), Redux Toolkit, Context API, TanStack Query, Zustand, Tailwind CSS, Material UI, ShadCN UI, React Hook Form, Zod, Framer Motion, HTML5, CSS3
- Backend:** Node.js, Express.js, REST APIs, JWT Authentication, Authorization, RBAC, API Security
- Databases:** MongoDB, PostgreSQL, Redis
- Cloud:** AWS, Lambda, EC2, S3, CloudFront, IAM
- DevOps:** Git, GitHub, GitHub Actions, Docker, Nginx, CI/CD
- Architecture:** Microservices, REST API Design, Scalable Architecture, Design Systems, Caching, Performance Optimization, Database Indexing
- AI:** OpenAI APIs, LLMs, Prompt Engineering, Cursor, Claude Code, GitHub Copilot, AI-assisted Development

Projects

- Connected Care (Healthcare Platform)**

March 2025 – Present

 - Designed and developed an enterprise healthcare platform supporting doctors, patients, and laboratories.
 - Implemented secure RBAC across multiple user roles.
 - Reduced manual workflow through automated scheduling and digital reports.
 - Designed modular healthcare workflows supporting appointment scheduling, prescriptions, and laboratory management.
 - Improved patient engagement and reduced manual coordination through automation.
- Monarch (FinTech Application)**

August 2022 – February 2025

 - Built a finance web application improving **transaction processing speed by 30%**.
 - Designed and deployed scalable **REST APIs and microservices** using Node.js and Loopback.
 - Collaborated on feature development, testing, and debugging to ensure timely delivery.
 - Contributed to system reliability and scalability under increasing user load.
- Hostizzy (Property Listing Platform)**

September 2023 – January 2024

 - Developed a travel booking dashboard using **React.js and AWS**, increasing booking conversion rates by **~20%**.
 - Built secure APIs using **Node.js, Express.js, MongoDB** for real-time bookings and payments.
 - Focused on performance optimization and clean UI workflows.
- Farm Fetch (E-commerce Platform)**

February 2022 – July 2022

 - Developed an e-commerce platform enabling farmers to sell organic produce directly to customers.
 - Integrated secure payment gateways and optimized UI/UX for smoother checkout.
 - Reduced API response times by **~25%**, improving overall platform performance.
- Angaza (E-commerce Application)**

June 2021 – November 2021

 - Contributed to frontend development using **React.js, Redux, and CSS**.
 - Took a leadership role by managing frontend tasks and coordinating with the team.
 - Focused on feature implementation, testing, and bug fixes.

Education

- Bachelor of Science in Mathematics**

June 2016 – June 2019 | Jaipur, India

Rajasthan University
